

2015 OLYMPUS

REACHING FOR SAFETY EXCELLENCE

Daily Safety Focus

BACK 2 BASICS

As turnaround progresses, the days start to feel longer and we are all get tired, it is easy to loose focus on safety and push to get the work finished.

We must get back to the basics and focus on the small hazards that are hurting us.

- Walking is working, avoid talking on cell phones, texting and any other distractions when walking.
- Practice proper donning and doffing of PPE, including coveralls to prevent foreign bodies from entering your eye.
- Practice good housekeeping—You may not have put it there, but don't be the person that leaves it there.
- Use handrails—If you see someone not using a handrail, intervene!
- Stay focused—at this stage of the game it is easy to become distracted, take a moment, refocus on your task and the potential hazards it presents.

LEADER'S QUESTION TO WORKERS:

What hazards are you accepting?
