

20 DAYS INJURY FREE

February 9 — 15 2015

Pre-Week 5

SAFETY HEALTH & ENVIRONMENT				
Monday @ 9am	Previous 24 Hours	Total to Date	First Aid	Record. Injury
TURNAROUNDS & MAJORS				
# of Injuries	0	0	0	0
# of Incidents	0	1		
# Days Injury Free		20		
# of Observations	28	54		

PROPER PPE USE

PPE is your last line of defense, but only if properly used. Inaccurate use of PPE will not protect you from any encountered hazards.

Inaccurate use of PPE could include wearing poor fitting or poorly maintained PPE, not wearing PPE that meets the requirements set forth by Syncrude, selecting the wrong PPE for the task you are completing, not wearing PPE properly and not knowing how to best utilize your PPE for your protection.

Gloves can provide great hand protection, but it involves more than simply putting on a pair of gloves. You must assess the task you are performing and put on a glove that meets Syncrude standards, properly fits your hands, and will protect you from the hazards of the specific task you are performing.

Before you put your PPE on today, and every day inspect it. Is it worn out, does it fit, do you know how to use it? **Will it protect you from being injured?**

OLYMPUS SAFETY COMMUNICATION

EYE PROTECTION

Eye protection will not do its job if a proper seal is not in place. Any gap creates a risk of debris entering the eye. This is an easy risk to eliminate, before starting any task check the seal on your safety glasses, if you cannot obtain a proper seal, speak with your leader and upgrade your eyewear. If you notice another workers glasses do not have a proper seal, INTERVENE.

KEY LEARNINGS

Last week there was a near miss within the Turnaround and Majors organization in which a come along failed and started to reverse while under load. There were no injuries as the workers involved had completed the a proper FLRA fully understanding what could go wrong, and took all proper safety precautions while setting up the job.

LEADER'S QUESTION TO WORKERS
IS YOUR PPE PROTECTING YOU?
