# of Incidents	3	5		
# Shifts Injury Free		14		
# of Observations	292	946		

GET A GRIP

The current freeze/thaw weather pattern puts us at a higher risk for injury. Reduce the risk of slips, trips and falls by following these safety tips:

- ◆ Always stay aware and alert.
- ◆ Use handrails when available
- ◆ Watch out for each other
- ◆ Pay attention to what you are doing, don't read, write, text or talk on the phone while walking.
- ◆ Prepare yourself before you start walking by making sure your footwear is in good condition and appropriate for the ground conditions.

Be aware! Watch where you step. Use caution on wet, icy or uneven surfaces to avoid slipping or tripping. Take personal responsibility. Understand and mitigate the hazards around you and your co-workers.

Keep your eyes on the path to a safer workplace!

INTERACTION HIGHLIGHTS

- ◆ Workers were hoisting cables using a rope and were breaking the plane of the handrails. Interacted with workers and asked them to wear a harness and tie off.
- ◆ Interacted with a crew that accessed a scaffold without reading the tags.
- ◆ Worker was walking on a very icy surface and was not wearing traction aids. Asked co-worker to put on their traction aids.

When we see an at risk behavior it is our responsibility to our co workers to discuss it with them. Their safety is our priority. When you see something, say something!

LEADER'S QUESTION TO WORKERS

You take thousands of steps every day, are you aware of your surroundings with every step ?
